

creating a multivocal synthetic voice

Frederik Tollund Juutilainen

www.multivocal.org

voices and interfaces

headless computing, text-to-speech and language

synthetic voice creation

voice-recording, labour and non-plural identity

multivocal

representation, identity and aesthetics of synthesized voices

voice collection

Roskilde festival

Techfest

collective voice creation

unit-selection synthesis, comprehension, makefile-hell

challenges

sound quality, large amounts of data, bias and verification

the future of multivocal

possibilities of identity-based interfaces

thank you

[multi'vocal]
